

The Tree Houses at Chewton Glen, New Forest

Tree houses

The Chewton Glen is a Five Star Hotel on the edge of the New Forest in the Green Belt. This development of six tree houses was particularly challenging because it is set within a strip of mature oak woodland and all the trees had to be retained with no adverse impacts. Completed in 2012, this project was so successful that further suites are now being constructed.

Planners: Terrence O'Rourke Ltd
