

# Oakgrove, Caterham-on-the-Hill

## Large scale residential

This site was originally a hospital with sprawling grounds and a surrounding belt of woodland. The bulk of internal trees were poor quality, their loss was agreed in return for a comprehensive new tree planting strategy. Its focus on retaining several key groups within the site and the peripheral woodland, supplemented by new planting throughout the residential layout, was central in obtaining planning consent.

**Architect:** OSP Architecture
